

**When your life's on the line,  
with the area's only accredited**

**choose the hospital  
chest pain center.**

*San Angelo Community Medical Center is the area's first and only hospital to be accredited by the Society of Chest Pain Centers, the national chest pain center accreditation agency. That's important, because accredited centers have demonstrated expertise in the assessment, timely diagnosis and treatment of cardiac emergencies.\* Through collaboration with the City of San Angelo EMS, Community's Emergency Department and cardiac care teams treat heart attacks faster than any other hospital in the area. In fact, our times beat the national average throughout 2009.\*\* And we're proud to say that 98% of patients would recommend our emergency care.\*\*\**

*In an emergency, choose the area's leader in fast, nationally accredited heart care. Choose Community.*

\*According to the Society of Chest Pain Centers, [www.sccpc.org](http://www.sccpc.org). \*\*Comparative data reported on Hospital Compare by the U.S. Department of Health and Human Services and U.S. Centers for Medicare and Medicaid Services for heart attacks requiring angioplasty. \*\*\*According to patients' responses in an independent survey by HealthStream, December 2009.
